Name/s of the Resource Persons	Representative from TNS		

A short narration of the program

Memorandum of Understanding Signed Between TNS and St. Vincent College

On 23rd October 2024, St. Vincent College entered into a significant partnership with TNS by signing a Memorandum of Understanding (MOU) aimed at enhancing the professional and technical skills of its students. This collaboration focuses on providing specialized training and career development opportunities to prepare students for the competitive job market.

Under the terms of the MOU, TNS will offer comprehensive training programs in Power BI, Artificial Intelligence (AI), Microsoft Excel, and Personality Development. These programs are designed to equip students with in-demand technical skills and improve their interpersonal and professional competencies.

The training modules on Power BI and AI will introduce students to advanced data analytics and machine learning tools, enhancing their technological proficiency. The Excel training will focus on improving their efficiency in data management and analysis, a critical skill for many industries. Additionally, the Personality Development sessions will help students refine their communication skills, confidence, and workplace etiquette, ensuring their holistic growth.

Another key highlight of the partnership is placement assistance for the students. TNS will collaborate with the college to provide guidance and support in connecting students with potential employers, thereby increasing their employability and career prospects.

The signing of the MOU was celebrated as a milestone in the college's efforts to provide students with a blend of technical and soft skills required to excel in their chosen fields. Both St. Vincent College and TNS reaffirmed their commitment to fostering industry-ready talent and creating opportunities for students to succeed in a rapidly evolving professional landscape.
