Title of the Event	100-Hour Training Program on various software tools for St. Vincent College Students		
Date of the Event	12th November 2024 onwards	Place of the event	St. Vincent College
Objectives of the Event	To ensure that the students are up-to-date and upskilled so as to make them ready for the job market		
Name/s of the Resource Persons	Resource persons from TNS		

A short narration of the program

From 12th November 2024 onwards, 60 students of St. Vincent College participated in an intensive 100-hour training program focusing on Power BI, Excel, Artificial Intelligence (AI), and Personality Development. The sessions were conducted by expert resource persons from TNS, a reputed organization known for delivering high-quality professional training.

Objectives of the Program:

The primary aim of the program was to equip students with essential technical and soft skills to enhance their employability and prepare them for the dynamic demands of the modern workplace.

Key Areas of Training:

1. Power BI:

Students were trained in data visualization and analytics using Microsoft Power BI. They learned to create interactive dashboards, analyze complex datasets, and generate insightful reports to support data-driven decision-making.

2. Excel:

The training covered advanced Excel skills, including data management, formulae, pivot tables, macros, and visualization techniques, enabling students to work efficiently with large datasets and automate tasks.

3. Artificial Intelligence (AI):

Participants were introduced to the fundamentals of AI, machine learning concepts, and practical applications in various industries. Hands-on activities helped them understand AI's role in shaping future technologies.

4. Personality Development:

Sessions focused on building communication skills, leadership qualities, time management, and confidence, preparing students for professional environments and enhancing their interpersonal skills. The training was conducted in a blended mode, combining lectures with practical assignments and projects.

Resource persons from TNS provided real-world insights, interactive workshops, and personalized feedback to ensure an engaging learning experience. Periodic assessments and quizzes were conducted to track students' progress.

Outcomes of the Program:

- Students gained proficiency in tools and technologies that are highly valued in the job market.
- They developed a deeper understanding of how to apply technical skills in professional scenarios.
- The personality development component boosted their confidence and prepared them for job interviews and workplace interactions.

The 100-hour training program was a resounding success, equipping the students with essential skills for academic and professional growth. The collaboration between St. Vincent College and TNS demonstrated a strong commitment to student development and employability. Such initiatives reflect the institution's vision of fostering holistic education and preparing students for future challenges.

Name of the Collaborating Agency	TNS
Learning Outcomes of the Event for the Participants	The students learnt about Power BI, Excel, Artificial Intelligence (AI), and Personality Development.
Learning Outcomes for the Organizing team	The students learnt new skills and knowledge which will make them more ready for the job market
No. of Participants	60 students
Faculty in Charge	Dr. Gilbi John & Dr. Franklin Salvi
